

AIR CONDITIONING REPLACEMENT DATA

APPLICATION # _____

JOB ADDRESS: _____ APT# _____

Table with 3 columns: DATA, UNIT BEING REPLACED, NEW UNIT. Rows include Condenser Model, Max Amps / Circuit Size, Air Handler Model, Package Unit, Heat Pump, Manufacturer, EER / SEER, KW Heat, Nominal Tons, Height of unit from roof deck, Height of screen from roof deck, Duct Work, Smoke Detectors, Work due to re-roofing, Mechanical unit ground mounted, Unit screened by Landscaping.

City of Boca Raton Building Regulations Section 19-152 requires the Contractor to have a ladder in place at the time of inspection, for access to all work performed, when required.

As per Community Appearance Board Criteria 302.1.4 the mechanical equipment shall be screened by effective compatible architectural treatment.

All rooftop mechanical equipment being replaced, altered or relocated must be secured on rooftop curbs or engineered stands to comply with the wind resistance requirements in the Florida Building Code, per Boca Raton Building Regulations Section 19-33 (2).
